This year's theme: With the “Beyond Bor-
ders” theme, we encourage you to think not
only of geographical *borders* but also cul-
tural boundaries and other types of bounda-
ries that may need to be crossed: the border
from one proficiency level to the next, the
line between failure and success, the separa-
tions that exist between educational insti-
tutes serving different student populations,
etc. The idea of *beyond* is also an impor-
tant part of the theme; we want to hear about
innovative research, classroom practices, and
materials designed to push our teachers and
our students beyond their current abilities.
